

GULLEN RANGE WIND FARM

CLEAN ENERGY PROGRAM: EXAMPLES OF SOLAR SUPPLIERS

JAN 2016

The following suppliers of solar installations have been provided for information only with the aim of assisting Clean Energy Program applicants to obtain three quotes.

The supplier names have been gathered from applications to the Gullen Range Wind Farm Clean Energy Program to date. The list therefore does not represent a complete list of suppliers available in the Goulburn and Crookwell areas.

Gullen Range Wind Farm has not undertaken any review, audit or interview of any supplier and therefore provides no endorsement and assumes no responsibility for the competency or suitability of any supplier. We recommend you undertake your own review of suppliers before submitting an application to the Clean Energy Program.

If you would like your business to be added to list of suppliers please contact Gullen Range Wind Farm (see below for details).
